

BIG Standard Series

Our most economical ADA solution that still allows complete creative freedom of design, logos, colors and architectural accents.

- Our unique photopolymer process utilizes a washout process using plain tap water and its effluent is 100% biodegradable which can be disposed of in any public waste disposal system. Once the photopolymer is processed, many finishing options are available.
- For tactile signage, the unique imaging characteristics of photopolymer make it the choice of property owners as well as designers. Our specialized product line allows designers unlimited flexibility and provides fabricators with the raw material needed to meet all ADA regulations.

Optional raised logo at no additional cost
